

Job Overview

Web Designer

The web designer will work closely with the Creative Director. The candidate will manage a site from gathering requirements and putting the creative concept together, to going live. The role requires a high level of organization, attention to detail and the ability to prioritize tasks.

Using a combination of graphic design skills and technical knowledge of how web pages are created, the work involves:

- Receive information from the Account Manager and Creative Director at the design stage to answer questions such as: why is the site needed? who are the target audience? who are the leading competitors? etc;
- Producing a design that will be attractive to the target user, has a logical navigation system and has all the features required;
- Writing web pages in a combination of codes, such as HTML, Javascript, Actionscript, ColdFusion, Java, Perl, Flash and Dreamweaver;
- Comprehensive knowledge of web optimizations;
- Testing usability and accessibility of design
- Troubleshooting errors
- Ability to meet deadlines

The successful applicant will have comprehensive knowledge of web/graphic design packages such as Adobe Web/Design Suites in order to produce basic layout and manipulate images. Skills in cascading style sheets (CSS), e-commerce and server side technologies, such as PHP and internet security are also important.

Work experience: 1-3 years

Job Type: Full Time

Conditions: 3 month probation/health insurance/performance based bonus (if applicable)

Work examples: Portfolio of art/web design projects

Comprehensive written and spoken English a MUST

Job open to Thai/ASEAN nationals.
